

PRINCESS EV 7 KW AC CHARGER

GBT GUN

PRODUCT INFORMATION

The Princess EV Solutions 7kW Charger is a versatile, smart, and reliable electric vehicle charging station designed for both home and private use. Compatible with Type 1, Type 2, and GBT connectors, it delivers a powerful 7kW output with up to 32A of current, ensuring fast and efficient charging for a wide range of EVs. Built with multiple safety protections and rated IP54, it is ideal for both indoor and outdoor installations. The charger features an intuitive LCD display that shows real-time voltage, current, and power, along with options to adjust charging current and set delay timers for added convenience and energy savings. Easy to install with wall-mounted or floor-mounted options, it also supports OEM customization, including logo, color, and function, making it a perfect solution for personalized and branded EV charging.
