

Princess EV 22kW AC Wall Charger GB/T

PRODUCT INFORMATION

The Princess EV AC Wall Charger delivers efficient charging with 22 kW AC power, ideal for home charging . Featuring a 7-inch LCD screen, it provides real-time charging data, including time, voltage, current, power, and temperature. The charger supports the RFID card swipe authentication method.

Designed for durability, it holds an IP54 protection rating—moisture-proof, waterproof, mildew-resistant, dust-proof, and flame-retardant. Built-in safety features include protection against over/under-voltage, overload, and short circuit. It supports powerful data collection and communication functions via Ethernet and 4G, enabling remote monitoring and control.

Installation is straightforward. Fully compatible with all EVs on the market, the Princess EV AC Wall Charger offers a reliable and user-friendly solution for all your electric vehicle charging needs.

SPECIFICATION TABLE

DESCRIPTION	VALUE
Output Power	22 kW
Output Current	32A
Input Voltage	AC380V
Input Current	3P+N+PE
Input Current	32A
Frequency	50 Hz
Display	Available
Working Temperature	-30°C ~ +55°C
Altitude	2000M
IP level	IP 54
Unit Size	220 x 290 x 100 MM
Charging Method	RFID/PLUS AND CHARGE/APP
Supported Interface	OCCP
Communication Interface	4G/ETHERNET
Gun Cable Length	5M
Interface Standard	GB/T
BRAND	PRINCESS
